

LEADING THE WAY IN
BIOLOGICAL
TECHNOLOGY.

 **BUNCHABUGS-ST**
Beneficial Bacteria and Fungi

Buncha Bugs ST is a seed treatment which combines proprietary live biological technologies with a readily available micronutrient package. The combination of these technologies surround your seed and roots with microbes, carbon sources, and nutrition that are critical to seed germination and early season plant vigor.

- Faster emergence
- Better early season plant vigor
- Increase root mass
- Readily available micronutrient package

Treatment Rate: 2 ounces per 100 lbs of seed
